

OASIS is the General Services Administration (GSA) Federal Acquisition Service’s (FAS) next generation contract vehicle for complex professional services. The vehicle addresses a broad range of federal agency needs for professional service requirements that:

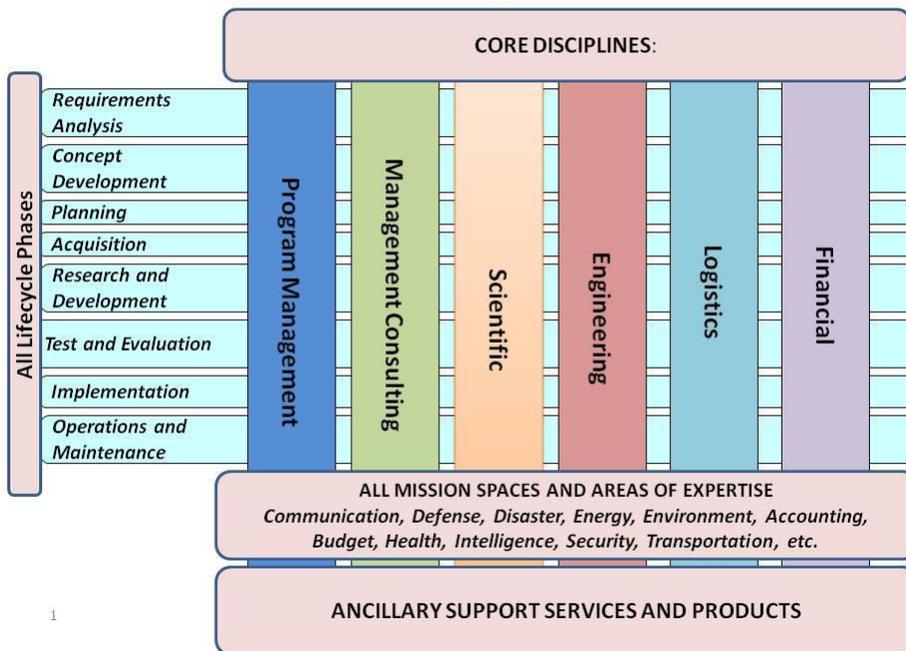

- Span multiple professional service disciplines;
- Contain significant IT components, but are not IT requirements in and of themselves;
- Contain Ancillary Support components commonly referred to as Other Direct Costs (ODCs);
- Require flexibility for all contract types at the task order level including cost reimbursement; and
- Any one or combination of all of the above.

The objective of OASIS SB is to provide government agencies with total integrated solutions for many professional, service-based requirements on a global basis. These professional service requirements may call for solutions that cross over multiple disciplines, include ancillary support, and require commercial and/or non-commercial items, using a variety of contract types including fixed-price, cost reimbursement, time and materials/labor hour, or a hybrid mix of contract types.

OASIS SB is available for use by all federal agencies and other entities as listed in GSA Order ADM 4800.2G, Eligibility to use GSA Sources And Supply; as amended.

OASIS SB Program Architecture

Regardless of the particular area of expertise or mission space of the agency originating the requirement, OASIS SB may be used to support and/or improve an organization’s program management, management consulting, engineering, scientific, logistics, and financial disciplines that span all life cycle phases for a total integrated solution as depicted in the OASIS SB Program Architecture illustration to the left.

OASIS SB is a family of seven separate OASIS SB multiple award, indefinite delivery, indefinite quantity (MA-IDIQ) contracts that span 28 NAICS

codes and 6 NAICS code exceptions under the economic subsector 541, Professional, Scientific, and Technical Services.

NAICS codes are grouped into six separate Pools based on 6 separate small business size standards (\$14M, \$19M, \$35.5M; 500 employees, 1,000 employees, and 1,500 employees). Pool 5 (1,000 employees) is split into Pool 5A (Exception B) and Pool 5B (Exception C) for a total of seven Pools. Each Pool is a separate OASIS SB MA-IDIQ task order contract based on NAICS codes and size standards.

The Air Force is an early adopter of OASIS SB and is intending to contract at least \$1.4B through this vehicle. Other initial Government interest has been expressed by the U.S. Army and Missile Defense Agency (MDA).

For more information on OASIS, go to www.gsa.gov/oasis.

MTSI's OASIS SB Awards

Modern Technology Solutions, Inc. (MTSI) is a contract holder for OASIS SB MA-IDIQ Pools 4, 5A, 5B, and 6. Current and future customers contracting for research and development activities in the air, space, & missile defense

mission areas can use these OASIS contracts to reach MTSI directly as a prime.

Each of the four Pools awarded MTSI provides a different focus of work. Pool 4 addresses professional services for research and development. Pool 5A addresses professional services for research and development activities for aircraft parts, auxiliary equipment and aircraft engine parts (NAICS 541712 Exception B, 1,000 employee SB size standard). Pool 5B addresses professional services for research and development activities for space vehicles and guided missiles, their propulsion units and parts, and their auxiliary equipment and parts (NAICS 541712 Exception C, 1,000 employee SB size standard). Pool 6 addresses professional services for research and development activities for aircraft (NAICS 541712 Exception A, 1,500 employee SB size standard).

Potential OASIS SB Pool 4, 5A, 5B, and 6 Users

Many of MTSI's customers contract for professional services under NAICS 541712 Exceptions A, B, and/or C. An illustrative list includes Air Force Space Command (AFSPC), Air Force Space and Missile Systems Center (SMC), Air Force Lifecycle Management Center (AFLCMC), Missile Defense Agency (MDA), Army Space and Missile Defense Command (USASMDC), Space and Naval Warfare Systems Command (SPAWAR), National Aeronautics and Space Administration (NASA), National Reconnaissance Office (NRO), National Air and Space Intelligence Center (NASIC), Missile and Space Intelligence Center (MSIC), other intelligence agencies, and various flight test organizations.

Advantages to Government Clients to Use OASIS SB

GSA has designed OASIS to be an easy-to-use contract vehicle with a very low contract use fee (0.1% for Air Force agencies, 0.75% for all other Federal agencies). The following is a brief summary of benefits:

- Enables agencies to concentrate on agency missions rather than the acquisition itself - minimizing unnecessary proliferation of interagency and agency-wide contracts;
- Reduces the lead time and administrative effort it currently takes agencies to acquire complex professional services across a broad set of mission spaces, core disciplines, ancillary support services, in all lifecycle phases;
- Ensures accurate SB subcontracting credit through the establishment of Pools based upon size standard – ensures appropriate size standard for each task order;
- Provides direct access to pre-qualified best-in-class service providers; and
- Maximizes SB Opportunities.

There are significant cost savings to government clients in using OASIS SB to reach MTSI professional services. First, contracting directly with MTSI as a prime contractor eliminates pass-through costs and fees other contractors will charge when MTSI is a subcontractor. This can often represent a 6-10% or more cost savings. Furthermore, GSA's contract use fee is significantly lower than what many other federal agencies charge to administer a contract, often 4-5%. Combined, clients are expected to save 10% or more by using OASIS SB to contract with MTSI. These cost savings allow for more funding directly available for mission support, critical in today's fiscally constrained environment.
